Customer Journey Map

The customer journey map illustrates the complete experience of a loan applicant throughout the loan eligibility prediction process. It identifies customer actions, interactions, thoughts, emotions, responsible stakeholders, and opportunities for improvement at every stage.

Phase of Journey	Stage 1 - Loan Application	Stage 2 - Loan Evaluation	Stage 3 - Prediction Result
Actions <i>What does the customer do?</i>	• Opens the Smart Lender web application. • Enters personal and financial details. • Uploads required information. • Clicks the Predict button.	• Waits while the ML model processes the application. • System validates the submitted information. • Loan eligibility is analyzed.	• Receives the prediction result. • Reviews approval or rejection status. • Uses the result for further loan processing.
Touchpoint <i>What part of the service do they interact with?</i>	• Loan application form. • Income, Loan Amount and Credit History fields. • Submit button	• Machine Learning prediction engine. • Flask backend server. • Database and trained model.	• Prediction result page. • Approval/Rejection message. • Recommendation displayed to the user.
Customer Thought <i>What is the customer thinking?</i>	• Will my information remain secure? • Is the application process simple? • Will I get quick results?	• Is my loan application being evaluated correctly? • Will my income and credit history affect the result? • Is the prediction accurate?	• Why was my application approved or rejected? • Can I improve my eligibility in the future? • What should I do next?
Customer Feeling <i>What is the customer feeling?</i>	• Hopeful about getting a loan. • Slightly nervous while entering financial details. • Confident about using the online system.	• Curious while waiting for the prediction. • Anxious about the final result. • Trusting the AI-based evaluation.	• Happy if approved. • Disappointed if rejected. • Motivated to improve financial profile if necessary.
Process Ownership <i>Who is in the lead on this?</i>	Loan Applicant	Flask Application & ML System	Loan Applicant / Bank Officer
Opportunities <i>How can we improve this stage?</i>	• Simplify the application form. • Provide field validation. • Improve user guidance.	• Increase prediction accuracy. • Reduce processing time. • Provide confidence score.	• Display rejection reasons. • Suggest ways to improve loan eligibility. • Provide downloadable prediction report.
